Guild wars 2 artificer guide 0- 400

Home> Players help players So actually I rushed through the artificer leveling with a guide I found on the net. It was pretty cheap in cost, but the guide only went to 400. Tips to level up to 500? I can't seem to understand some guides on the internet. 0 Don't refresh this page. It could change. Updated: 2020-11-22T13:00:04+00:00 Permalink NA/EU price data only Note: You follow a Core guide. You're done! Report this ad Guild Wars 2 Artificer Level 0 to 400 Fast Guide from DastionThis guide assumes that you know the basics of crafting, Material progression, how discoveries work, etc. If you don't know these things, then the wiki article about crafting would be a good read. The idea here is to quickly and relatively cheaply level your Artificing while avoiding Fine Crafting materials (enemy drops) that tend to cost a lot on the TP. This gives you the added bonus of making cheaper items for more XP and saving those Fine Materials for another crafting profession or to sell for a profit. All the items below have relatively inexpensive ingredients, so you can craft at least 6-8 of them for the price you would take to do a single discovery related to Fine Materials. What's more, the shelves, ingots, or Tuning Crystals can be sold on the TP (Shelves/Ingots) or Vendor (Tuning Crystals) for enough to usually recoup your costs for these materials. Below is the list of items you create at each skill level. These items colored green remains the same with each layer. Those colored red will upgrade based on the layer you're on (i.e. 0 uses Green Wood to make shelves, 75 uses Soft Wood)-0, 75, 150, 225, 300: Make shelves (wood), ingots (Ore), or Crystals (Discovery: 6 stacks of fabric). Just sell the shelves/ingots back on the TP, the tuning crystals actually trader for almost cost.-25, 100, 175, 250, 325: Make Potions or Centaur Slaying, this requires 1x 1x of water, 1x root, 1x leather section 1x pile of fabric.-50, 125, 200, 275, 350: You have two options that depend on the current market on which is cheaper. The first is Potions or Ogre Slaying, it requires 1x Jug of Water, 1x Sage, 1x Pile of Fabric, 1x Leather Section. Alternatively, you can make Potions or Dredge Slaying, which requires 1x Jug of Water, 1x Pile of Dust 1x Current Tier or Ore, 1x Last Tier or Ore. So it starts with Tin & Copper Ore and progresses.-390->400: You won't have any more drinks here. Just buy the trader's 375 Carrion Mithril Imbued Inscription for Karma and discover 3-4 Combinations to hit 400. Carrion uses Large Bones, easily the most common Fine Material as everything in Orr drops it. Don't refresh this page. It could change.
