## Uncle sam meme template

It is a free online image maker that allows you to add custom modifiable text to images. It works with html5 canvases, so images are instantly created on your own device. Most commonly, people use generators to add text captions to established memes, so it's technically more of a meme caption than a meme maker. However, you can also upload your own images as templates. How do I customize a meme? You can drag the text box to move and resize it. If you are using a mobile device, you must select Enable drag and drop in the More Options section. You can customize the font color and outline color next to where you type text. You can further customize fonts and add text boxes in the More Options section. Imgflip supports all web fonts and Windows/Mac fonts, including bold and italics, if installed on the device. Other fonts on the device are also available. Note that Android and other mobile operating systems may support fewer fonts unless you install them yourself. You can insert other images, including popular or custom stickers and scum bag hats, deal-with-it sunglasses, callouts, and more. Opacity and resize are supported. Uploaded templates can be rotated, flipped, and trimmed. You can draw, outline, or doodle on memes using the panel just above the meme preview image. You can create a meme chain of multiple images stacked vertically by adding a new image in the Below current image setting. Can I use a generator more than just a meme? Meme Generator is a flexible tool for many purposes. By uploading custom images and using all customizations, you can design many creative pieces, including posters, banners, ads, and other custom graphics. Why is there a .com watermark in my meme? Imgflip watermarks help others find out where the memes were created, so they can make memes too! but if you really want to, you can not only remove our watermarks from every image you create, but also remove ads and use Imgflip Pro or Imgflip Pro Basic to overcharge your image creation abilities.
